Top 10 tips to avoid bloating

AND HAVE GOOD DIGESTION

CHEW SLOWLY

Digestion starts in your mouth! Most people devour their food so quickly that their bodies can't catch up. Chew slowly and very well as everything has to be broken down into liquid to be able to be digested.

NO DRINKS WITH YOUR MEALS

If you have water or any drinks WITH your meal you dilute your stomach acid and make it weaker which results in weaker digestion and more undigested food which will then end up fermenting and building up gas. Have water 30 minutes prior and 60 minutes after your meals.

EAT DINNER EARLY

Your digestion is the strongest when the sun is at its highest which is mid-day. Once the sun goes down your body is not in digestion mode any longer and is ready to wind down. Have an early dinner, ideally, be done eating by around 7 pm. You will also notice that you'll sleep sooo much better since your body is no longer busy digesting food while you are sleeping and is instead getting proper rest.

NO FRUIT AFTER COOKED FOOD

Fruits are the easiest and quickest digestion food and should always be eaten alone, on an empty stomach. When you eat fruit after cooked food, it sits on top of whatever you ate before, can't pass through and will start to ferment and build up gas. No more fruit salad post dinner heheh!

SIT DOWN TO EAT

Eating on the go or while being distracted is so common these days and really impacts your digestion negatively. Sit down to eat, take a deep breath, light a candle and really ENJOY every bite. The taste, texture, the love you put into making your food. It makes such a difference! When you eat on the go your body is not in rest and digest mode but rather in fight or flight mode which raises your cortisol and will make you store more fat than actually burning it.

10 DAY DE-BLOAT RESET

3 BREATHS BEFORE EACH MEAL

This leads me straight to the next point which is breaaaathing. Take 3 deep breaths right now and see what that does to your body. You should instantly feel more present, more at ease and it gives your body that necessary calmness to properly focus on resting and digesting. It's a habit I have been cultivating in our home for years now and love it as a little pre-meal ritual to be grateful and thankful for the food we get to eat.

FOCUS ON BITTER FOODS

The more bitter and the less tasty the better hahah! Seriously though, green juices, salads and herbal teas made from bitter greens are your digestions best frieeend!! Bitter foods are what most people shy away from but they are a real powerhouse for your stomach acid and gut flora! Arugula, chicory, endive, nettle, dandelion etc. are AMAZING!

STOP WHEN YOU ARE FULL

When you are eating in a calm, peaceful environment, no rush, no distractions and fully focusing on your food, you'll develop a better sense of knowing of when you are full. We all have days where we overeat. And of course, you SHOULD eat until you are fully satisfied, buuutt not so much that your tummy hurts hehe! Keep that in mind and try to listen to your body for signals that you've had enough.

FOOD COMBINING

The most important one! Each food has a different digesting time and we want to combine foods that share a similar time. Fruits and vegetables should always be eaten first, followed by less watery foods - baked potatoes for example come last. All meals have been carefully put together for you here so you really don't have to think about it during the reset.

KEEP YOUR CORTISOL LOW

Cortisol is our stress hormone. It makes you hold on to water weight, stores fat (especially around your abdomen) and weakens your digestion. You have probably felt it many times that whenever you feel stressed, it immediately impacts your digestion. This is another reason why I LOOOVE my workout philosophy and all our home workouts SO MUCH. Not only will you get long, lean and toned you'll also keep your cortisol low which means better results and great digestion,

CHEW SLOWLY

EVERYTHING HAS TO BE TURNED INTO LIQUID

Digestion starts in your mouth! Most people devour their food so quickly that their bodies can't catch up. They don't chew their food properly and end up with un-digested food pieces in their digestive tract which then leads to fermentation and gasses.

Once you build those gasses, it can take weeks to get them all out of your colon. Crazyyy right? So even say, days later, you could be eating something and you'll think that thing made you bloated but in reality, it's still that gas inside your colon from days/weeks ago not allowing you to empty your bowels properly.

Chew slowlyyyy and veryyyy well. Remember, everything you eat has to be broken down into liquid form to be fully digested. That's why green smoothies are such a powerhouse. It's because your body actually absorbs ALL the goodness you are drinking. Even with smoothies though: drink them slowly, chew on each sip a little and have them BEFORE your meals. That's why our reset routine works so well: we eat light to heavy: water, juice, smoothie, fruit, dates, greens, soups, potatoes... etc.

Chewing your food properly is the easiest way to improve your digestion and avoid bloating no matter what diet you are eating.

NO DRINKS WITH YOUR MEALS

30 MINS BEFORE // 60 MINS AFTER

Having water or any drinks WITH your meal will dilute your stomach acid, making it weaker and therefore weakening your digestion.

Your stomach acid is what breaks down your food, absorbing all the nutrients and then transporting them to each cell (with the help of other hormones like insulin).

The stronger your stomach acid, the better your digestion, so it really all starts with strengthening your digestive juuuuuice. Otherwise, you end up with undigested food in your colon which results in fermentation and gases.

Have water 30 mins prior to and 60 mins after your meals for optimal digestion.

Eat Dinner EARLY

The earlier the better really! :) It's all a matter of getting used to it and starting your evening wind-down routine early as well so you are all set to eat by 5:30/6:30 pm. It's ideal to give your body 2 hours to digest after dinner before you head to bed. That way you are getting the most restorative sleep as your body isn't busy digesting food.

NO FRUIT AFTER COOKED FOOD

THEY END UP SITTING ON TOP AND NOT PASSING THROUGH

Fruit is the easiest and quickest food to digest and should always be eaten alone, on an empty stomach.

When you eat fruit after cooked food, it sits on top of whatever you ate before and can't pass through. Which means it starts to ferment and build up gasses. No more fruit salad post dinner heheh!

It's such an easy switch buuuut made the biggest difference to my digestion 12 years ago when I first heard about the different food digestion times. I used to always eat things like apples post-dinner and wondered why it made me look 9 months pregnant.

Fruit is good for you and heals your gut and your body from the inside out - but only if they are able to be digested properly. Keep an eye out for that and if you have fruit in the afternoon make sure you leave a good 2-hour window after your last meal to eat them.

You don't have to be rigid about this but keep it in mind next time you think the fruit you ate wasn't good for you. It's probably more so the order in which you ate those fruits. :-)

To get the maximum results on this reset, we are having fruit on an empty stomach and what's even better is having MONO fruit meals meaning you eat ONE type of fruit only but as much of it as you like.

SIT DOWN TO EAT

This one is huge as your body should be fulllllyy relaxed when you eat. You want to keep your cortisol low, be at ease, and sit down to enjoy your meal. That way you are noticing what you are eating and you're enjoying the different flavours much more because you are fully present with your meal. I have been living this example in real life since having Hailey! I used to always eat watching YouTube or doing work at the same time but now I am chatting to Hailey, sitting down with her and it's only about the food, nothing else which is really relaxing and helps my digestion a lot as my body is in rest & digest mode and not in fight or flight mode.

3 DEEP BREATHS BEFORE EACH MEAL

TO BE FULLY PRESENT & RELAXED

I loove this little mini practice that you can do anywhere, anytime, no matter what diet you are following.

Make this your everyday mini meditation. It takes less than a minute and is always available to you.

Give it a go right now and see what a difference 3 deeeep breaths make right away!

AMAZING right? It's such a simple tool to bring you into the 'here and now' and also something you can practice with your whole family. Before dinner have a mini mindful moment to connect. Your digestion will thank you as it automatically relaxes your nervous system and lowers your cortisol.

FOCUS ON BITTER FOODS

THE LESS TASTY THE BETTER

The more bitter and the less tasty the better hahah! Seriously though, green juices, salads and herbal teas made from bitter greens are your digestions best frieeend!!

Bitter food is what most people shy away from but they are a real powerhouse for your stomach acid and gut flora! Arugula, chicory, endive, nettle, dandelion and grapefruits are all AMAZING!

Eating more bitter greens (like in our de-bloat salad) also helps a lot with keeping your sugar cravings intact.

Whenever you have the option go for bitter greens!

STOP WHEN YOU ARE FULL

AND BE IN TUNE WITH YOUR BODY

It's easier said than done, I knooooo especially when our meals are SO YUM heheh buut once you learn to not use food to cope with the emotions you are going through, you'll find it so easy to stop when you are full.

Overeating is in most cases due to stress, anxiousness, and feeling overwhelmed. People who want to lose weight often tend to overeat as well. Has that ever happened to you before? Try not wanting to lose weight and simply love your body the way it is RIGHT NOW and you'll instantly

feel the pressure easing off and won't have the need to overeat anymore. The environment you are eating in is so important as well. When you are eating in a calm, peaceful environment, no rush, no distractions and fully focusing on your food you'll develop a better sense of knowing when you are full.

Keep in mind, we all have days we overeat but following this lifestyle and my home workouts will get you so much more aligned with what your body really needs.

You SHOULD eat until you are fully satisfied buuutt not until your tummy hurts hehe!

@CarolineDeisler

FOOD COMBINING

FOOD GROUPS THAT PAIR WELL TOGETHER

Food combining plays a huge role and really makes THE biggest difference to your digestion. I would say, it's the most important point of all of these actually!

Each food has a different digestion time and we want to combine foods that share a similar digestion time so they can easily pass through your colon.

Fruits and vegetables should always be eaten first, followed by less watery foods and things like baked potatoes come last.

All meals are carefully put together for you here though so you really don't have to think about it!

Eating light to heavy is the key to optimal digestion!

KEEP YOUR CORTISOL LOW

Cortisol is our stress hormone, it makes your body look puffy, holds on to water weight, stores fat (especially around your abdomen) and weakens your digestion. You have probably felt it many times that whenever you feel stressed, irritated or emotionally drained, it immediately impacts your gut and digestion. Another reason why I LOOOVE my workout philosophy and all our home workouts SO MUCH is this. You get long, lean and toned while keeping your cortisol levels low which means better results, great digestion and no binge eating.

AND GUIDELINES

INTERMITTENT FASTING

Option 1: *Intermittent fasting*

Celery juice & a shot in the morning

(Green) smoothie + fruit meal or recipe for lunch

Option 2: *No intermittent fasting*

Celery juice, shot, (green) smoothie during the first

half of the day + fruit meal or recipe for lunch

METABOLISM BOOST

This RESET specifically focuses on metabolism-boosting foods like ginger, lemons, grapefruits, papayas, pineapple, turmeric, aloe vera etc. I highly recommend making all the shot and smoothie recipes and drinking them in the right order to help your body eliminating waste. Don't worry if you skip a day, but come straight back to it hehe!

FRUIT MEAL OR RECIPE LUNCH

You have the option to have a fruit meal OR healthy recipe for lunch. Both are amazing and it really depends on what leaves you feeling more satisfied. I love a fruit mono meal of juicyyy melons, ripe mangoes or anything that's in season + have some medjool dates as a snack a little later. Having the (green) smoothie first gives your body the perfect balance!!

The Workouts

THAT KEEP THE BLOAT AWAY

Doing the right workout is just as important as everything else. The key part of my workout philosophy is to **WORK WITH YOUR BODY**. We want to get toned and lean AND feel our best at the same time. Alsooo if you're not enjoying it, then what's the point really, right?

My workouts are all about keeping our cortisol low (= zero stress) and enjoying every moment of it. It's our ME TIME of the day, to reset, to re-focus and to check in with ourselves.

I used to mainly do intense HIIT and cardio workouts yeaars ago which made me look puffy and inflamed. My body was holding on to water weight and

I didnt get the results I wanted. I was actually feeling more hungry, more irritated and not balanced at all.

Once I started my own home workout journey, it all suddenly felt so effortless as I was enjoying it sooo much. No screaming instructor, no hectic timer and instead a slow burn that got me sore for days!

Combining my meal plans and workouts is the ultimate recipe for success and gives you neeeeext level results. Food and fitness go hand in hand, the right fuel forms the base for physical results and the right workouts help to avoid overeating. It's really all so connected and I can't wait to see you all crushing our workout program alongside our reset meal plan.

CELERY Juice

Ingredients

1 big head of celery to make 500ml juice

I have been drinking celery juice for over 12 years now and it's such a game-changer, especially when you have it on an empty stomach. To save time, make a big batch all at once and freeze it in glass bottles then simply defrost it overnight in the fridge.

STEPS

Add celery stalks to your juicer to make celery juice.

I sometimes use a cold-pressed juicer at home but most of the time I go for an early morning walk with Hailey to buy my juice. I love this routine!

Ingredients

½ cup ripe Papaya
2 tbsp apple cider vinegar
Small piece ginger
¼ cup water

Notes

Add all ingredients to a high-speed blender and blend until smooth. Using a small blender like a Nutribullet works best to make our shots!

I have been drinking this shot everyyy morning for months now and am really loving it!! I also love to make a few portions and have it prepped for a few days as it stays fresh for 3-4 days.

Day 1

DIGEST Smoothie

@CarolineDeisler

Ingredients

DRINK IT ALL

- ¼ cup pure aloe vera juice
- 2 cups fresh or frozen pineapple
- Big Handful of fresh spinach
- ½ large cucumber
- 1 cup water

Directions

Add all ingredients into a blender and blend until smooth!! Drink on an empty stomach for the best results.

Aloe vera juice is suuuch a good ALL NATURAL digestion aid that helps to get things moving if you know what I meeean ahah! I love this smoothie, especially on an empty stomach.

Day 1 - Lunch option 1

Ingredients

LOTS OF FRESH FRUITS, A mono meal with one type of fruit would be ideal! depending on what you have in season right now:

IDEAS:

- Melons
- Fresh figs
- Papayas
- Mangoes
- Oranges
- Peaches
- Dates

Notes

The EASIEST-TO-DIGEST LUNCH! Fresh fruit (as long as it's ripe - veryyy important) is your gut's best friend. Hydrating, rich in fibre, get everything going, keep your energy up and are so easy to eat anywhere!

Ideally, go for a mono meal. This means you eat one type of fruit until you are fully satisfied. If you are mixing fruits, bananas and mangoes go well and oranges and pineapples. Melons should alwayyys be eaten alone, peaches and nectarines are a good match too! Try to avoid mixing watery fruits like oranges with bananas for example.

Day 1 - Lunch option 2

SPINACH BANANA PANCAKES

Ingredients

1 large ripe banana
½ cup oat flour
½ cup almond milk
1 cup fresh spinach

TOPPINGS

1 large banana

DATE CARAMEL:

3 large medjool dates
½ cup water
1 tsp vanilla extract

Steps

- 1** Add pancake ingredients to a small blender and blend until smooth. Pour the batter into a non-stick pan to make 3 fluffy and delicious pancakes. Don't shy away from doubling the ingredients to make more, I sometimes do that if I'm quite hungry and these are so healthyyyy! Cook for a few minutes on each side!
- 2** Slice the banana for a topping and add to a non-stick pan with a sprinkle of coconut sugar. Fry for 5-7 minutes until golden OR, optionally, add the banana pieces to each pancake while they're cooking.
- 3** Make the caramel sauce by adding dates, water and vanilla to a blender and blend until smooth! YUMM!

Day 1 - Snack

MEDJOO DATES

Ingredients

5-10 medjool dates

Note

Medjool dates are the easiest, most satisfying snack when you need a little afternoon pick me up!! There isn't a day without dates for me and I typically eat around 15 for lunch OR 5-10 if it's more of a snack. If you had the recipe for lunch instead of the fruit meal, make sure you are leaving around a 2-hour gap in between eating so the lunch can be fully digested first.

Day 1 - Dinner

GUT RESET BOWL

Ingredients

1 cup steamed broccoli
½ cup steamed spinach
1 cup steamed greens beans
2 cups steamed potatoes, cooled down

SAUCE

1 small raw zucchini
1 tbsp tahini
½ cup water
Lemon juice
Apple cider vinegar
1 tsp mustard
Optional: 1 bunch fresh chives or dill

Steps

- 1** Peel and steam your potatoes for 25 minutes until soft. Let them cool down. If I don't have pre-cooked potatoes from the day before, I put mine in the freezer for 5 minutes to cool them down first. Eating cold potatoes is AMAZING for your gut health as the starch turns into resistant starch and feeds the good kind of gut bacteria!
- 2** Steam your veggies and add all ingredients to a bowl.
- 3** Make the dressing by adding all ingredients to a small blender and blend until smooth. Mix it all together and ENJOYYYY!

Day 1 – Dinner option 2

GLOW SOUP

Ingredients

1 small head cauliflower florets
1/2 kabocha squash
2 small sweet potatoes
OR 4 medium size potatoes
3 stalks celery
2 small carrots (optional)
1 leek
2 tbsp Italian herbs
5 cups water

Steps

- 1** Peel and slice kabocha squash and potatoes. Chop celery, leek and carrots and add all to a pot together with the cauliflower florets, 5 cups of water and Italian herbs.
- 2** Bring to a boil, reduce heat and let it simmer for 20 minutes.
- 3** Take out about 1 cup of the soup cooking water, then blend half of the soup to make it extra creamy. This is the easiest most delicious soup that I make all the time! So comforting and nourishing!!!

Day 1 – Post dinner

DIGEST TEA

Ingredients

- 1 tbsp fennel seeds
- 1 tsp licorice root powder
- 1 liter of hot water

Steps

- 1 Add fennel seeds and licorice root powder to a teapot, add hot water and let it sit for 10 minutes.
- 2 I have been drinking this tea for almost 7 years now and LOVE it!! It's so soothing for your tummy and has that perfectly light sweet note. My go-to after dinner when winding down to sleep.

Day 2 - Grapefruit Shot

Ingredients

1 whole grapefruit, peeled
1 medjool date
½ cup water
Juice of 1 lemon

Day 2

DE-BLOAT Smoothie

@CarolineDeisler

Ingredients

2 frozen bananas
2-3 cm piece ginger
1 whole lemon, peel removed
2 whole Grapefruits, peel removed
1 cup water

Directions

Add all ingredients to a blender and blend until smooth!!

Using the whole lemon and grapefruits (peel removed) is a great natural digestion aid, instead of just using the juice. You get all the fiber in + the bitterness is THE BEST for your gut health!

Day 2 - Lunch option 1

CAROB CHIA PUDDING

Ingredients

¼ cup chia seeds
1 cup water

CREAM

2 ripe bananas
2 tbsp carob powder
3 medjool dates
¼ cup pecans
½ cup water

Steps

- 1 Soak chia seeds in water for at least 30 minutes or overnight.
- 2 Add all cream ingredients to a high-speed blender and blend until smooth. Mix the cream into your chia seed mixture, top with more carob powder and anything else you fancy like fresh banana slices or berries and ENJOYYYY!!

I am on a carob powder roll haha, it's just soooo delicious and so, so healthy + since it's naturally caffeine-free (compared to cacao powder) it's also less irritating for your colon and doesn't give your adrenal glands a spike.

- 4 mini cucumbers
- 1 avocado
- Juice of 1 lemon
- 1 tsp ground cumin (optional)
- Handful cherry tomatoes

Day 2 - Dinner

PUMPKIN SOUP & POTATOES

Ingredients

1 Kabocha squash or Hokkaido pumpkin (about 3 cups)
1 tsp cumin seeds
3 cups vegetable broth

ON THE SIDE

6-7 medium size steamed potatoes

Steps

- 1** Wash the pumpkin and cut it into cubes.
- 2** Add cumin seeds to a pot, toast them for a few minutes on medium heat, then add vegetable broth and pumpkin. Let it all simmer for 20-25 minutes or until the pumpkin is soft.
- 3** In the meantime, also peel and steam your potatoes.
- 4** Take out 1-2 cups of the pumpkin cooking water (it's perfect to sip on) and blend the rest until smooth. Top with black pepper, any dried herbs of your choice and fresh parsley or chives.

Day 2 - Post dinner

GINGER TEA

Ingredients

2-3 cm piece fresh ginger
500ml hot water

Steps

- 1** Grate ginger and add to a tea pot. Cover with hot water and run through a sieve to get rid of the tiny ginger peel pieces. Your tea is readdyy!
- 2** Alternatively, I love to add fresh ginger, lemon and a bit of water to a blender, blend until smooth and add a splash to my hot water. Both ways are great!
- 3** You can also use your pre-made ginger shot, add a little to your hot water aaand enjoy!!

Day 3 - Snack

MEDJOOOL DATES

Ingredients

5-10 medjool dates

Steps

Medjool dates are the easiest, most satisfying snack when you need a little afternoon pick me up!! There isn't a day without dates for me and I typically eat around 15 for lunch OR 5-10 if it's more of a snack. If you had the recipe for lunch instead of the fruit meal, make sure you are leaving around a 2-hour gap in between eating so the lunch can first be fully digested.

Day 3 - Dinner

DE-BLOAT SALAD

Ingredients

Handful arugula
Handful chicory
Handful radicchio
Raw fermented sauerkraut
1 avocado
1 cucumber
1 tbsp freshly ground flax seeds

1 Medjool date
Handful fresh coriander
Handful celery
3 tbsp apple cider vinegar
1 tbsp tahini

Day 3 - Dinner

POTATOES

Ingredients

5 medium size potatoes

Steps

- 1** I love to peel my potatoes and boil or steam them for 25 minutes until soft then let them fully cool down as cold potatoes are kind of a weight loss trick hehehe! Once they've cooled down, the starch turns into resistant starch and doesn't get digested. Great for your gut health and figure!!
- 2** Another option would be to first steam your potatoes for about 15-20 minutes and then air fry them for another 15 minutes until golden and crisp!! Both are super yum but steamed, cooled potatoes are especially satiating.
